

Pedestrian Safety

Where possible pedestrians should use pavements, first floor corridors and defined pedestrian walkways to minimise the interface with workplace transport. Roads should only be crossed at designated crossing points. Pedestrians within the Fruit and Vegetable Market should use the buyers walk, not the front of unit aprons as a walkway.

Pedestrians in loading and unloading areas should be fully aware of fork Lift Truck (FLT) activity and make every effort to use the nearest marked walkway. Pedestrians must be aware of the 'Keep clear' lane which is used for FLT activity, marked in front of unit aprons on 'D' road in the fruit and vegetable market.

High visibility clothing should be worn by anyone regularly working in close proximity to workplace transport and is mandatory for drivers of Fork Lift and Reach Trucks.

Tenants Safety Bulletin Jul 2016

Pedestrian Routes

You will be aware of many ongoing and new developments around the market which means possible changes to some pedestrian routes. As a result, you could be unaware of changes in traffic flows putting yourself at risk. Please read and circulate the information shown below to your staff and any visitors you have and also emphasis:

- ✓ The importance of wearing high visibility clothing.
- ✓ Keeping to marked pedestrian routes.
- ✓ Not to take an easier but possibly unsafe option.
